# Operation

The meat should be as lean as possible. Using lean meat will help the meat dry faster and aid in cleanup by decreasing fat drippings. Ground meat should be 80% to 95% lean. Jerky seasonings are available for all tastes or you can be creative and make your own. Ground turkey, venison, buffalo and elk are excellent choices for jerky. There are many books and recipes to help create your own jerky. When making jerky, you should cure the mixture with sodium nitrate. The cure is used to help prevent botulism while drying at low
